HERBST BROTHERS' SPECIAL SCOT'S PINE

is the product of the most pains-taking tree-breeding in the last 200 years of practical forestry.

FOR STRAIGHT- GROWING TREES

General Data: These trees grow from 65 to 98 feet high and attain an age of 66 to 120 years. Knots usually on upper third of trunk—lower two-thirds clear. Needles 2 3-10 inches to 3 1-10 inches long—borne in very heavy clusters. Color of needles: deep green from September to April—a trifle lighter from May to August. Seedlings reach a height of 4 to 6 inches in first year—growth thereafter, 11 to 25 inches yearly.

It's Fast Growing and Good

Please remember that ALL "H. B. SPECIAL SEED" are gathered from trees—never from the ground.

The climber's equipment consists of: a half-bushel conebag slung across the shoulders; a light-weight 8 to 10 foot pole with a hooked end for drawing in the cone-bearing branches for ease in picking; and the usual lineman's climbers.

Test The SEEDS You Plant

THE MASTER SEED TESTER is an attractive flat dish in which is placed a porous disc and over the disc fits a clear glass bell. *You just put one hundred seeds, (one in each little recess in the porous disc,) add water, put on the glass bell and Nature does the rest.* Nothing could be simpler, nothing could be more effective.
